

PROGETTI PLANT SOLUTIONS

Progetti: Quality Engineering

More than twenty years of experience, a staff composed of first-rate engineers and the habit of supplying **turn-key technological solutions** within the several usage fields, a natural international inclination: these are just some of our strong points.

We operate in the civil and industrial divisions, designing and realizing **mechanical systems** for air conditioning, **refrigeration** and heating, power **electrical systems**, lightening, weak and special currents, as well as technologically innovative drying systems for the ceramics industry, air treatment plants and **advanced energy recovery and renewable energy systems**.

From the concept to works management and the realization of single installations to the total management of job orders: we ensure our customer **custom-made, flexible and punctual services** under all circumstances.

We establish authentic partnership relations with our customers and always achieve absolutely excellent results under all circumstances.

Respecting delivery times, budgets and all agreed parameters is an irremissible point of honour for us.

Progetti Plant Solutions

Progetti Plant Solutions **designs** and **carries out** mechanical and electrical systems by supplying **Turn-key solutions**. The attitude to the **project management** allows to coordinate the most complex processes and to optimize all logistic and financial resources. **Progetti** are able to supply "**custom-made**" systems that meet the final user's needs by employing the most modern techniques and applications available in the market

Our Services

Progetti Plant Solutions supplies the following services:

- Preventive economical analysis and technical feasibility
- **Project Planning**
- Materials purchase, transport, yard logistics
- **Management of Job Orders**
- **Installation** by high-specialized staff
- **Works direction**
- **Commissioning** including training for systems running
- International technological **global service** assistance
line installation assistance and **24-hour tele-assistance**

Progetti in the World

The analysis of final investment costs and energy consumption the building management, the high technical construction standard of equipments and materials identify Progetti's absolute professionalism at a **national and international** level.

DISTRICT HEATING SYSTEM (ITALY)

Sectors of responsibility

Progetti Plant Solutions operate in the civil, industrial and hospital sector: **schools, hospitals, airports, civil** and **industrial** structures of any dimension and everywhere in the world: anywhere we have installed functional and efficient systems, adequate for the most strict regulations. Many installations in the field of the **nuclear medicine** make Progetti a company specialized in this sector.

Our systems

Progetti Plant Solutions guarantee solutions that support the best available technology at very competitive costs in the following fields:

Mechanical systems

- Air conditioning and Heating
- Hydraulic
- Fire-prevention
- Regulation
- Automation and management systems
- Gas
- Fluids
- Energy transfer and recovery
- Primary water treatment systems
- Turn-key installation

Electrical systems

- Transformation booth
- Distribution and power lines
- Lightning
- Burglar alarms
- Loads management and Control systems
- Electrical Automation
- Energy Transport
- Fire-prevention
- Telephone
- Alternative and renewable energies
- Cogeneration systems
- Turn-key installation

Special services

The know-how matured by Progetti in more than thirty years of experience has allowed to reach a high-profiled competence increased in value also thanks to the **SOA certificate** and the recognition of the categories: **OG10, OG11, OS3, OS28, OS30** of high level.

Important customers such as the *San Raffaele Foundation (HSR)*, have recognized Progetti as a **technical partner**, identifying a solid private contractor subject able to supply a valid **technological global service**. This support comprise all the ordinary maintenance activities, corrective and extraordinary maintenance and propose a contract solution able to offer high performance levels with a great estimation guarantee and price control.
